

Since this is an OSINT challenge, we need to figure out some default credentials. The website reveals nothing, so I took a screenshot of the login box and searched for “exact matches” on google’s reverse image search:

---

Lynx - device.report

251 x 227

Creating a Westermo Tech Support File

444 x 452

I got 2 results, both coming from a pdf file which mentions the default credentials we needed.

Entering them gives us the flag.
