

So, to find stuff about the guy mentioned I used <https://epieos.com/> and found a google review to a waterfall.

However, there was an issue. The google plus code I found wasn't working. I read a writeup, in which they used another google plus code, In the same area but nonetheless wrong.

The actual code is **8726+75 Brezoi**, but the writeup used **872J+WX Brezoi**. The plus code used in the writeup does in fact generate the flag.

As a result, I have to mark this challenge as **IMPOSSIBLE**.
