To translate the question, we see the word pikachu, so after a quick search we find out it's pikalang.

Q1. The esoteric language used is probably pikalang, given it's the one used to encode the questions. The answer turns out to be right

Q2. The answer is pretty random, but it refers to what tools was used to make the capture. After many many attempts, networkminer works.

Q3. After looking through the packet, the ip 10.20.230.192 keeps popping up, so it's one of the first attempts.

Q4. A quick search of the string "pizza" tells us a pizza was ordered from www.pizzahut.ro
